KEEP IN MIND

- Prioritise the pump — slow eccentrics (3–4 s down) on isolation work.
- Symmetry is built by identifying and hammering weak points.
- Cardio: 2–3 x 20–30 min LISS sessions per week to stay lean.
- Posing practice: 5 min/day teaches you to flex and control muscles.
- Slight calorie surplus (200–300 kcal over TDEE) for lean bulking.

UNIVERSAL RULES

- Warm up 5–10 min before every session. Cold muscles = injuries.
- Never sacrifice form for weight — ego lifting kills progress.
- Hydrate: minimum 3 L water per day on training days.
- Track macros. Nutrition is 70% of your results.
