KEEP IN MIND

- Rest 2–3 min compounds, 60–90 s isolation.
- Bro split works — high frequency diet and sleep seal the deal.
- Rotate exercises every 6–8 weeks to prevent adaptation.
- Priority principle: train your weakest area first while energy is highest.

UNIVERSAL RULES

- Warm up 5–10 min before every session. Cold muscles = injuries.
- Never sacrifice form for weight — ego lifting kills progress.
- Hydrate: minimum 3 L water per day on training days.
- Track macros. Nutrition is 70% of your results.
