KEEP IN MIND

- Rest 45–60 s between sets to keep heart rate elevated.
- Add 15–20 min LISS cardio after training or on rest days.

- Caloric deficit: 300–500 kcal below TDEE — no more.
- Protein target: 2.2 g per kg of bodyweight to protect muscle.
- Do NOT drop intensity — lower calories, not training performance.

UNIVERSAL RULES

- Warm up 5–10 min before every session. Cold muscles = injuries.
- Never sacrifice form for weight — ego lifting kills progress.
- Hydrate: minimum 3 L water per day on training days.
- Track macros. Nutrition is 70% of your results.
