KEEP IN MIND

- Rest 2–3 min between compound sets; 60–90 s isolation.
- Progressive overload is mandatory — log every single session.
- Deload every 6–8 weeks: drop volume/intensity by 40%.
- Sleep 7–9 hours. Muscle is built outside the gym.

UNIVERSAL RULES

- Warm up 5–10 min before every session. Cold muscles = injuries.
- Never sacrifice form for weight — ego lifting kills progress.
- Hydrate: minimum 3 L water per day on training days.
- Track macros. Nutrition is 70% of your results.
