## 4-WEEK PROGRESSION TIMELINE

| WEEK   | FOCUS                                                                    |
|--------|--------------------------------------------------------------------------|
| Week 1 | Establish baseline. Track every meal. Hit protein target above all else. |
| Week 2 | Tighten calorie window. Assess hunger, energy, and scale trend.          |
| Week 3 | Adjust: if scale unchanged, reduce by 100–150 kcal further.              |
| Week 4 | Review progress photos + 7-day scale average. Plan next phase.           |
