

FLEXFACTORX

STRENGTH PPL PLAN

Push · Pull · Legs — Powerbuilding

PUSH DAY (Strength Focus)

EXERCISE	SETS	REPS	NOTES
Bench Press	5	3–5	Work to top set — linear progression
Overhead Press (BB)	4	5	Standing strict — no leg drive
Close Grip Bench Press	3	8	Tricep strength for bench lockout
Weighted Dips	3	8–10	Heavy — chest + tricep

PULL DAY (Strength Focus)

EXERCISE	SETS	REPS	NOTES
Conventional Deadlift	5	3–5	Max tension — brace throughout
Pendlay Row	4	5	Explosive pull, reset each rep
Weighted Pull-ups	3	6–8	Add load when sets feel easy
Barbell Curl	3	8	Supports elbow flexion for pulls
Hammer Curl	3	8	Brachialis + forearm strength

LEGS DAY (Strength Focus)

EXERCISE	SETS	REPS	NOTES
Barbell Back Squat	5	3–5	Primary leg strength builder
Front Squat / Pause Squat	3	5	Positional strength, quad dominance
Romanian Deadlift	4	8	Hamstring strength for deadlift
Leg Press	3	10	Volume for quad development
Standing Calf Raise	4	10–12	Progressive load, slow reps

KEEP IN MIND

- Rest 3–5 min between heavy compound sets — CNS recovery is real.
- Track estimated 1RM every 6 weeks to measure actual progress.
- Linear progression: +2.5 kg upper body, +5 kg lower body each week.
- Use a belt for sets above 85% 1RM — a tool, not a crutch.

- Mobility work non-negotiable: hips, thoracic spine, ankles.

UNIVERSAL RULES

- Warm up 5–10 min before every session. Cold muscles = injuries.
- Never sacrifice form for weight — ego lifting kills progress.
- Hydrate: minimum 3 L water per day on training days.
- Track macros. Nutrition is 70% of your results.
